

# FISHERIES INVESTIGATIONS AND HABITAT ASSESSMENTS

EES Consulting staff has conducted over 100 fisheries investigations in the United States, Canada, and overseas during the past 20 years. Senior staff has more than sixty years experience as project managers and principal scientists with experience ranging from species inventories to complex toxicity and radio telemetry and entrainment studies. We assist our clients in developing fisheries investigations that meet their needs and goals, while addressing the regulatory agency's objectives in a cost-effective and efficient manner.

## SERVICES PROVIDED

- Project scoping
- Agency consultation
- Habitat assessment
- Habitat restoration
- Species inventories
- Growth and age analysis
- Species population composition, distribution and abundance surveys
- Electro-shocking surveys
- Species interaction analysis
